

Status of CONRAD Research

Henry L. Gabelnick, Ph.D.

Microbicides Trial Network Meeting

March 26, 2007

CONRAD Planned Activities

- ◆ Continued development of preclinical models for safety and efficacy *in vitro*, small animals and non-human primates
- ◆ Clinical safety studies looking for biomarkers and animal correlations
- ◆ Combination product development based on UC-781, tenofovir and other proprietary compounds
- ◆ Evaluation of Q2 as an aid to achieve longer-acting, less coitally dependent formulations
- ◆ Development of alternative delivery systems such as sponges and mechanical barriers (eg, caps and diaphragms)

Collaboration with Field

- ◆ Provide access to UC-781 and tenofovir
- ◆ Coordinate activities
- ◆ Provide technical assistance
 - ▶ Formulation
 - ▶ Manufacturing, packaging and labeling

CAVEATS

- Funding
- IP
