

MTN 015 Data Communiqué #11

February 1, 2016

This is official study documentation for MTN 015. Please circulate it among relevant staff for their review, print it, and place it in your MTN 015 SSP Manual in the Data Communiqués section. This document is considered part of the MTN 015 SSP manual.

UPDATES

1. New “PAP Test Result” CRF – for ASPIRE Participants only

SCHARP has issued a new form, PAP Test Result CRF, dated 01-DEC-15, to document results of Pap specimens collected during MTN-015 participation (i.e., as part of MTN-015 pelvic exams, or MTN-020 pelvic exams that occurred while a participant was co-enrolled in MTN-015). *Completion of this form is required for MTN-020 (ASPIRE) participants only.* Per protocol, Pap specimens are collected at 6 month intervals in the first year after seroconversion, and then annually if the initial test results are negative.

Sites are asked to complete the data review and submission (that is, complete and submit this CRF to document the result of each Pap smear collected during MTN-015 participation) by **February 29, 2016.**

This form is posted on the MTN-015 Atlas web page (link below) under the Individual CRFs section, as well as in the “Complete Set” pdf.
