Dear Colleagues:

The Microbicide Trials Network (MTN) annual meeting will be held Sunday through Wednesday, **February 10-13, 2013 at the Bethesda North Marriott Hotel & Conference Center, 5701 Marinelli Road, North Bethesda, MD 20852**. The intended participants include 2 representatives from each CTU (for example, principal investigator, site coordinator), as well as staff from Leadership (CORE, SDMC, CL, NIH), RCC, PPD and other collaborating partners. There will be a divided plenary session on Monday and Tuesday morning, and protocol break-out sessions in the afternoon. Investigators directly affiliated with MTN should plan to have representation at the meeting for all three days. **Guests and other organizations doing microbicide research would be most likely interested in attending the plenary sessions on the mornings of Monday and Tuesday.**

The various activities throughout the 3 days will focus on:

- An update on ongoing and completed MTN studies;
- Scientific updates including HIV resistance, adherence, ARV and protocol updates;
- Opportunities for discussions between representatives of MTN protocol teams, working groups, partners and the NIH

Meeting information will be routinely posted on the MTN website at www.mtnstopshiv.org

Online registration is available on the MTN website. **Meeting registration is required if you plan to attend any session during the annual meeting.** The link to the MTN Annual Meeting webpage is: <http://www.mtnstopshiv.org/2013annualmeeting>
